

Omkami Long Life Radiator Coolant

Automotive Radiator Coolant/Antifreeze

Omkami Long-Life Radiator Coolant is designed to use without further dilution for long-life performance in the cooling systems of all types of liquid-cooled automotive vehicle and industrial internal combustion engines. Omkami Long-Life Radiator Coolant used anti-rusting additives to protect all metal materials in engine cooling system. With corrosion inhibitors, its helps to prevent metals such as steel, copper, aluminum and iron from corrosion effectively. It ensures the engine cooling system from over-heating in summer and anti-freezing in winter season.

MEET PERFORMANCE STANDARDS

- BS 6580
- ASTM D3306 / D4985
- JIS K2234
- GM 1825M
- GM 1899M

BENEFITS

- Excellent anti corrosion and rust properties
- Long-Life performance
- Good heat transfer properties

TYPICAL APPLICATIONS

- Suitable to use in all types of vehicle include diesel or gasoline engine with liquid-cooled systems.
- Suitable for use in industrial internal combustion engines.

TYPICAL PROPERTIES

	Test Method	Long-Life Radiator Coolant
Appearance	Visual	Bright & Clear
Colour	Visual	Green
Density, kg/m ³ @ 30°C	ASTM D4052	1.070
Freezing Point °c	ANTI-FREEZE TESTER	-37
pH	pH Meter	10.2
Boiling Point °c	ANTI-FREEZE TESTER	129

*Typical properties do not constitute as specifications. Omkami reserves the right to amend and change the information herein without notification as result of continual product research and development.
